

One Avighna Park shines in Limca Book of Records

Transcendence at the Grand Entrance Lobby of One Avighna Park (Actual Photograph)

MUMBAI'S finest luxury residence project – the 61-storied One Avighna Park at Lower Parel – has an entrance lobby that reflects the sheer scale of the project. Transcendence, the stunning creation of 54,450 imported crystals at One Avighna Park, has made it to the record books. The just-released 2017 edition of Limca Book of Records has lauded the fantastic feature as the "Largest Art Installation Made of Crystals in the Lobby of a Residential Tower".

A striking detail of the art installation is that the Egyptian crystals, each with a di-

ameter of 40mm, add up to a length of 2.6km. The creation weighs over 5,000 kg and is fixed at a height of more than 12ft, lending a majestic look to the entrance lobby. "One Avighna Park is the perfect blend of world-class design, globally sourced quality materials and an international team of skilled workers to execute this vision. Transcendence is one of the fine details that define this iconic building and we are glad that it has made it to the record books," says Nishant Agarwal, Managing Director, Avighna India.

The installation curated by

artist Pronit Nath gives a preview of the project's luxury quotient.

Counted amongst the finest residential buildings in the country, it is the rare high-rise with a pre-certified Platinum Rating from the Indian Green Building Council (IGBC), the benefits and cost-savings of which its residents will enjoy for decades to come.

Standing tall in the heart of the vibrant Lower Parel area, One Avighna Park is among the select luxury housing projects to have acquired a full Occupation Certificate. Having Sky Villas in configuration of 3, 4, 5BHK and limited edition duplexes, the luxury homes at One Avighna Park are ready for possession and the first of the residents have already moved in. The 39 international and national awards bagged by One Avighna Park, including 'World's Best Residential High-Rise Development' are a testimony to the project's excellence and uniqueness.
